SUMMARY

The proposed project is an AI Resume Generator Web Application that helps users create professional resumes quickly and easily. Many students and job seekers face difficulties in designing resumes and writing professional content. This project solves these problems by providing a platform where users can enter their information, select templates, and generate resumes instantly. The application will include features like multiple resume templates, AI-based suggestions, and PDF download options. The project will be developed using the MERN stack (MongoDB, Express.js, React.js, and Node.js). The main goal is to build a simple, fast, and user-friendly resume generator. This project will also improve practical web development skills and provide a useful tool for students and professionals.

WORK EXPERIENCE

backend developer 2020 to 2026
Google

In today's competitive job market, a professional resume is very important for getting internships and jobs. Many students and freshers do not know how to create attractive resumes. Existing resume builders are often expensive, difficult to use, or have limited free features. With the growth of online hiring and digital applications, there is a strong need for an easy-to-use resume generator platform that allows users to create resumes quickly without design knowledge

PROJECTS

event app [Project Link](#)
Bhai, maine dusre wale template (Richard Sanchez design) ka code bhi exact usi standard variable-safe system par bana diya hai.

my app [Project Link](#)
Isme image loading ka jo issue aapko aa raha tha, use theek karne ke liye maine CSS ke andar ek extra technique use ki hai: agar aap url bhejoge toh image container ke andar properly stretch-free object-fit: cover hokar dikhegi, aur agar image nahi hogi toh elegant grey fallback block automatic space le lega taaki Puppeteer render crash na kare.

Expanse app [Project Link](#)
applications. User requirements and modern UI/UX trends will also be studied. This project will use a practical development approach with literature review and analysis of existing resume builder
