PROFILE

Event Schema Explanation (YouTube Script)

EXPERIENCE

2020 - 2026

backend developer

Google

Event Schema Explanation (YouTube Script) "Now we are going to create our Event Schema using Mongoose." "This schema defines how event data will be stored in our database." "We are building this because our main project is an Event Management System." "So we need to store all event-related information in a structured way." 🚀 Fields Explanation "In this schema, we have several important fields." "The first field is title." "It is a string type and it is required." "The second field is description." "It is also a string and it describes what the event is about." "The third field is location." "This tells us where the event will take place." "The fourth field is date." "It is a Date type and it stores the event date and time." "The fifth field is image." "This stores the event image URL or path." 👤 User Relationship (IMPORTANT PART) "Now let's understand the user field."
