LANGUAGES

PROFILE

assionate and results-driven Computer Science student with a strong foundation in full-stack web development and a proven ability to transform ideas into practical, user-focused applications. Experienced in designing and developing projects such as AI-powered Resume Generators, Event Management Systems, and Expense Tracking Solutions. Skilled at learning new technologies quickly, solving complex problems, and delivering clean, scalable solutions. Committed to continuous growth, innovation, and creating products that provide real value to users and organizations

EXPERIENCE

Full stack

2024 - 2026

Selfexperience

Full-Stack Developer with 2 years of hands-on experience in building web applications like AI Resume Generator, Event Management System, and Expense Tracker. Skilled in creating user-friendly, scalable, and efficient solutions with strong problem-solving abilities and continuous learning mindset.

PROJECTS

College Event Management System

[View Project](#)

Developed a role-based event management system where admins manage event postings and users can view event information efficiently

Expense Management System

[View Project](#)

Built an expense tracking application featuring OTP-based authentication, daily expense monitoring, monthly budget management, and automated notifications for overspending.

AI Resume Generator

[View Project](#)

Developing an AI-powered resume generator application that helps users create professional resumes based on their skills, education, and experience. The system generates well-structured resumes automatically and provides customizable templates for different career profiles. Currently in development, with deployment in progress.
